

Hotel Booking System

Hotel booking System is a user-friendly online accommodation booking system that integrates seamlessly with your existing website, empowering you to take reservations 24 hours a day, 7 days a week.

Suited to single hotels, motels, resorts, B&B's right through to hotel chains, so no matter how big or how small your hotel is, you can truly benefit from providing a cost effective booking system from your very own website. Hotel booking system offers one low Flat Rate Fee per confirmed reservation, no minimum monthly fees, no maintenance fees, and no setup fees. The system checks in real time room availability, prices, etc and pay online with credit cards. The prices vary as per the season and for the type of room (single, double, with balcony, etc). It provides the facility to give discounts for long stays, returning guests and many more. It can be easily managed and updated from back office. Instant notification is sent via fax and email to the hotels.

End Users have separate login to track their reservations and cancel them. Site owners have separate login to manage the entire portal. Individual hoteliers have their own login to manage their room availability and check up for their reservations. The system delivers real-time online reservations to consumers, travel agencies and corporate clients directly from the web site
