

Community Software

This software allows jewelry business associates (retailers, diamond vendors, color stone dealers, jewelry manufacturers) search their inventory 24x7. Whether business associates have website or not, jewelers can search their inventory through community software. Business associates can respond to jewelers post and requests. Business associates can chat and participate in different discussion groups within the industry. They can also store respective business details & access the same from anywhere in the world.

Some Features of Community Software:

- **Desktop Software :-** Installs easily on your computer desktop
- **Chat Rooms:-** Chat with your suppliers & your clients
- **Directory:-** Directory of every body in the jewelry industry: Diamond dealers, Gem Dealers, Jewelry Manufacturers, Services, Designers, watch dealers and manufacturers
- **Diamond Search:-** Search through thousands of diamonds for the best price and availability from your favorite suppliers
- **Forum and Marketplace:-** Discussion groups about the industry and business channels
- **Event Calendar:-** Find out when and where your favorite show will be and the contact information and how to register for a specific show
- **Contact Management:** - Keep track of the phone number, addresses, and contact information of your suppliers and also your customers. Access from any computer worldwide
- **Color Stone Posting:** - Post for any color stones and let gem dealers contact you with your request.
- **Diamond Appraisals:-** Find out what the replacement value of your diamond is and also the availability in the market
- **Steaming Diamond Specials:-** Look for diamond specials and bid for best price
- **Online Magazine and News:** - Daily industry news. Find out what's going on in the industry and stay up to date and learn how to market your business
